-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-5 and 7 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harris (6,050,223) in view of Evans (Des. 351,694). Harris discloses a litter mat which is used in a method for collecting debris from an animal's paw, wherein the mat comprises a grid formed of channels having rounded top portions (20); wherein the channels are parallel and in spaced relation with each other. Although the mat of Harris is secured to a base (16), it is not shown that the mat fits in a tray (i.e. the base does not have walls). Evans teaches a mat which fits into a tray, wherein the tray has a base with a perimeter and a wall that extends along and from the base. It would have been obvious to one of ordinary skill in the art at the time the invention was made to provide that the base of the Harris invention have walls to form an enclosed tray into which the mat fits as taught by Evans so that the litter which falls into the receptacle (20) of Harris remains trapped (i.e. does not spill out the edges (24,26) onto the floor) within the mat until such time that the user wishes to lift the mat to dump the spent litter material. With respect to claim 3, although Harris shows a receptacle space (22)

between the channels, the dimensions of that space is not specifically disclosed. It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide that the space between the channels is between 1/16 inch and 1/2 inch, since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum ranges involves only routine skill in the art. *In re Aller*, 105 USPQ 233.

Allowable Subject Matter

3. Claim 6 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: the prior art does not show the subject matter of the base and intervening claims in addition to the grid having a stand to which all the channels are connected and which supports them above the base.
